## TABLE II

---

### VARIATION IN POPULATION SINCE 1872.

---

**NOTE.**—The figures for population shown in this table for 1891, 1881, and 1872 have been corrected to show the population of the area of each district as it stood on March 1st, 1901. Where the actual population of any area transferred could be ascertained, it was used to calculate the population of the area in 1901; in other cases the principle followed has been to assume that the density of population is uniform in any one district, which is a sufficiently accurate approximation. It was only found necessary to use the latter method in the cases of Jhānsi (1872), Ghāzipur and Ballia (1881 and 1872), and for a very small portion of the transfer between Naini Tal and Almora (1881 and 1872).

No census was taken in Oudh in 1872. The figures shown in this table for the twelve Oudh districts are those of the Oudh census in 1869.

## TABLE X.

---

## LANGUAGE.

---

The table is divided into two parts:—

- (A) Showing by districts the number speaking each of the vernaculars of the provinces, the more important vernaculars of other parts of India (*viz.*, Pashto, Marathi, Gujarati, Panjabi, Marwari, Rajasthani and Bengali) and English, and
- (B) Showing the totals for the provinces, and for native states by linguistic families.

NOTE.—The general entry in schedules for the vernaculars of these provinces was either Urdu or Hindi. The number returned as speaking the latter has been divided amongst Central Pahari, Western Hindi, Eastern Hindi and Bihari according to a geographical distribution of these languages based on notes supplied by Dr. Grierson, in charge of the Linguistic Survey. The method of distribution is explained in Chapter VI of the report.
